## 1. INTRODUCTION

Royal Decree-Law 13/2010, of December 3, has introduced an important modernization process, dividing the airport and air navigation management functions that in Spain had been performed by the Entidad Pública Empresarial Aena, with the objective of improving the efficiency and effectiveness of the Spanish airport system.

Aena Aeropuertos is created within this modernization process and it shall be responsible for the management of the airports which until now had been managed by Entidad Pública Empresarial Aena.

The Council of Ministers on June 3, 2011 approved an agreement which authorizes the asset transfer from Aena to Aena Aeropuertos and a rise in the capital stock of the new company. These measures are necessary for Aena Aeropuertos to start functioning effectively, from June 8, 2011.

Aena Aeropuertos shall carry out all the duties and obligations developed by Entidad Pública Empresarial Aena until June 7, 2011 as regards management and operation of airport services, and any others that national or international law gives to the airport operator, in relation to the network integrated by airports and heliports managed by Aena.

From July 5, 2014, Aena Aeropuertos S.A changes its name into Aena SME, S.A. The airports and heliports that it manages are the following:

Adolfo Suarez Madrid-Barajas and Josep Tarradellas Barcelona-El Prat.

Alicante Elche, Gran Canaria, Tenerife Sur, Málaga-Costa del Sol and Palma de Mallorca.

Bilbao, Fuerteventura, Girona, Ibiza, César Manrique-Lanzarote, Menorca, Santiago, Sevilla, Tenerife Norte and Valencia.

### **Definition:**

Use of airport facilities to provide boarding and disembarking services to passengers through air bridges or the use of an apron position that impedes the use of air bridges to other users.

**Taxpayer** The company that runs the aircraft.

**Rates:** This rate will be calculated by considering the aircraft's weight and time at the air bridge with the following formula:

$$P = (p_1 + p_2 * T_m) * F_t, \text{ where:}$$

P: Total amount to pay for the service.

p<sub>1</sub>: unit rate for the time in position at air bridge.

p<sub>2</sub>: unit rate for the aircraft's weight and time at the air bridge.

T<sub>m</sub>: maximum take-off weight of the aircraft, in tons.

F<sub>t</sub> : time that the aircraft remains at the air bridge, per 15 minutes or period.

Unit rates for p<sub>1</sub> and p<sub>2</sub> are shown in the table below:

Airport	P <sub>1</sub> (€)	P <sub>2</sub> (€)
Adolfo Suárez Madrid-Barajas	25,677524	0,00
Josep Tarradellas Barcelona-El Prat	23,280197	0,00
Alicante-Elche, Gran Canaria, Tenerife Sur, Málaga-Costa del Sol and Palma de Mallorca	20,473658	0,00

For those aircrafts connected to more than an air bridge simultaneously, and parked in apron positions specially designed for this purpose, the rates for each additional air bridge will be reduced by 25%.

Between zero and six, local time, when an aircraft is in an apron position and the operating company requests a remote parking position but at that time that place is not available, or if the airport operator decides not to change it due to operational reasons, the airport shall disconnect the apron service and shall interrupt the computation of time for charging purposes. However, the company will be forced to move the aircraft to a remote parking position when it will be required because there is available position or because the previous reasons have disappeared. Failure to do this and the fact that it cannot be used by any other users, upon request, the rate to apply will be the one that would have been payable if such uses are not made.

## 2.5 FUEL AND LUBRICANT

**Definition:** Use of the airport infrastructures to transport and supply fuel and lubricant, by any means of transport or supply.

**Taxpayer:** Product suppliers.

## EXEMPTION AND INCENTIVES

## 6. INCENTIVES

### Exemptions

No aeronautical charges shall be satisfied, referred to in this guide, by the operations performed by the Spanish state aircrafts, aircraft serving for autonomous communities and other local entities, provided that they perform non commercial public services, and foreign State aircrafts, in the case that the Nations to which they belong have similar exemption for Spanish state aircrafts.

### Incentive for operations on certain days of the week in the Canary Airports

There is a right to a subsidy of 50% of the amount of landing and passengers charges, for flights in airports in the Canary Islands - with the exception of inter island flights- the days of the week that are reflected in the following table, provided that the beneficiary of the subsidy maintains the number of operations already scheduled for the remaining days of the week, at the deadline set by the industry for the return of slots of the winter season (August 31) and summer (January 31) accordingly.

<b>Airport</b>	<b>Day of the week</b>
Fuerteventura	Tuesday and Friday
Gran Canaria	Tuesday
La Palma	All days
Lanzarote	Wednesday
Tenerife Norte	Saturday
Tenerife Sur	Thursday

The enjoyment of this subsidy shall exclude the application of bonus for landing and passengers charges under Law 21/2003, Sections 75.7 and 78.3.

The subsidy must be requested during the month of January 2020, and will be met by Aena SME, S.A. offsetting the amount to any amounts owed by the beneficiaries and, if it cannot be possible in whole or in part, by payment in cash before May 31, 2021.

### Commercial incentive for 2020 Summer and Winter seasons.

There will be an incentive per season, as defined in Law 21/2003, to promote the start of routes to new destinations at both, short and medium haul, and long haul.

Air carriers operating in Spanish airports managed by Aena SME, S.A. are entitled to get an incentive for their contribution to the growth of passengers on routes operated from Aena airports with less than 3 million passengers annually.

Furthermore, air carriers will be entitled to get an incentive for their contribution to the growth of passengers on long-haul routes operated from Aena airports.

The incentives of the above paragraphs will be calculated as an amount equivalent to 75% of the average passenger charge for the air carrier on the route per season, and will be applied to the additional passengers on the route per season compared to the previous equivalent one. The incentive will be proportional to the contribution of each air carrier to the growth generated in the

route. Additionally, if, in the following equivalent season, the air carrier at least maintains the number of departing passengers on that route, an additional 25% discount will be applied.

In all the above situations, the number of passengers considered for the incentive of each air carrier will have the cap on the number of passengers that the airline has grown at the airport. In this case their distribution by route will be proportional to the contribution of the air carrier to the growth of each route.

In addition, for each air carrier, the number of passengers considered at the network level will not be higher than its growth in Spanish airports managed by Aena SME, S.A. In this case, their distribution by route will be proportional to the passengers referred to in the previous paragraph.

Finally, for routes with origin at airports where a mechanism for reducing the seasonal variation is applied, as it is stated in law 21/2003, there is also an incentive for the contribution to the growth of passengers on routes operated in the previous equivalent off-peak season.

The incentive of the previous paragraph will be equivalent to 5% of the average amount of the passenger charge of the airline on the route and will apply exclusively to the number of additional departing passengers of the route during the off-peak season, compared to the previous off-peak season. The incentive will be proportional to the contribution to the growth generated in that route.

In addition, if in the following off-peak season the airline at least maintains the number of departing passengers on that route, an additional 5% of the amount of the passenger charge of the airline will be paid.

In the previous case, for each airline, the number of passengers considered for the incentive will not be higher than the growth of the company at the airport and the distribution by route of the number of passengers will be proportional to the contribution of the airline to the growth of each route.

For the Canary Island airports, the incentive will be applied to the amount of passenger charge once applied subsidies for operations on certain days of the week in the Canary Airports, regulated by Law 2/2012.

The growth of each airline cannot be due to the mere transfer of passengers between companies within the same group, or agreements between airlines to share their program or align strategies in order to have access to the incentive. For these purposes, Aena will assess whether the increase in passengers of an airline is because some of the above reasons, and has the power to nullify the incentive if it were so

For the purpose of this incentive, a route is defined as the set of operations of commercial air transport of passengers, departing from an airport of Aena SME, S.A. and destination another airport. It will be considered as the same route to the same destination, the one that even if it is operated to different airports, these are part of the same catchment area

For the purpose of this incentive it is considered that a route to a destination has not been operated in the previous equivalent season if it did not exceed 1.000 departing passengers in the winter season or 1.500 in the summer season. In this sense, to be considered a route operated in a season, the route to a certain destination must exceed 1.000 departing passengers in the winter season and 1.500 in the summer one.

For the purpose of the corresponding incentive, a route will be considered as long-haul when the destination is outside the EEA and the orthodrome distance to it is more than 4.000 km.

The incentives must be requested during the following month to that in which the season that generates the right to the incentive, finishes. It will be paid by Aena by compensating its amount with any other amounts owed by the beneficiaries and, if this is not possible, in whole or in part, by payments in cash before the end of the month of June of the following year to that of the beginning of the seasons that generated the right to the incentive.

To receive the incentive, the air carrier must be up to date with payments to Aena SME, S.A.

### **Extraordinary incentive to alleviate the reduction of activity by the Thomas Cook Group**

Airlines shall have right to an incentive for the number of additional seats to international destinations on commercial flights operated during the Winter Season 2019 in relation to the seats programmed at 31st of August 2019 at the Canary and Balearic Island Airports.

Additional seats will be incentivized with 100% discount of the average passenger charge paid by each airline at the group of Canary Island Airports and at group of Balearic Island Airports during the 2019 Winter Season, from the 27th of October 2019 to the 28th of March 2020.

Therefore, the amount of the incentive shall be equivalent to the volume of additional seats as described, multiplied by the average passenger charge in the Canary and Balearic Island airports respectively.

The amount above mentioned will be due once the 2019 Winter Season ends and has to be requested by the airlines before the end of the month of April 2020. It will be paid during the month of June 2020 following the same criteria as the existing incentives at Aena, that is, by compensating its amount with any other amounts owed by the beneficiaries and, if this is not possible, in whole or in part, by payments in cash.

The incentive will be calculated taking into account the net number of seats operated by the airline at the Canary and Balearic Island Airports to international destinations. Additionally, if the airline reduces its total seats programmed in the whole of Aena's airports in relation to the deadline of 31st of August, the incentive will be applied at a maximum to the net seat increase operated at the network.

The additional seat growth of each airline cannot be due to the mere transfer of passengers between companies within the same group, or agreements between airlines to share their program or align strategies in order to have access to the incentive. For these purposes, Aena will assess whether the increase in seats of an airline is because some of the above reasons, and has the power to nullify the incentive if it were so.

To receive the incentive, the air carrier must be up to date with payments to Aena SME, S.A.

For the purpose of this incentive, the airlines considered will be those that at least operate 1.000 departure seats in international routes during the 2019 Winter Season.

This extraordinary incentive does not substitute the new destination and growth incentives currently in force at Aena, but it complements them. In any case and to prevent potential overlapping of incentives, the calculation will be the following:

- For each airline and for each one of its routes, the amount of incentives due for growth or new destinations launched shall be calculated according to their conditions. On the other hand, the amount due for the extraordinary incentive shall also be calculated for each of the routes.
- This way, if the extraordinary incentive of each route is higher than the one due to the airline for growth and new destinations incentives, Aena will pay to the airline the difference between both amounts.
- On the contrary, if the extraordinary incentive is equal or less than the growth and new destination incentive, the latter shall be applied and Aena will not pay any amount for the extraordinary incentive.
