

To the Mooney Community:

HOW TO BUY

We are pleased to announce that as of September 1, 2020, a long awaited transition at Mooney took place. There is new management at Mooney and it's made up entirely of pilots and Mooney owners giving the company a unique and valuable perspective going forward. So, on behalf of new management, I wanted to take this opportunity to inform you that the reports of Mooney's death are greatly exaggerated. Mooney is, in fact, very much alive, up and running.

You can expect to see some changes at Mooney which we believe are long overdue. Plan to witness a new culture and approach which is reflective of the new ownership's love of aviation, flying and Mooney aircraft.

Our first priority is to reengage and rebuild our relationship with the Mooney Community. For those of you who are Mooney pilots and owners, folks that make a living selling or fixing Mooney aircraft, or just fans of Mooney, we want you to know that we recognize that you are our life's blood. You are our best spokespeople, our most informed advocates and our most loyal customers. It is our goal to do right by you and rebuild your trust in Mooney. In fact, our number one priority is to build a customer support infrastructure that can capably reward your loyalty which has been the hallmark of the Mooney consumer for years.

Our first and immediate focus is to make sure that we're properly servicing the community's fleet of over 7000 aircraft. For the last 6 months, we've taken over parts production and managed to keep the spares moving to the service centers. We have plans to improve our efficiency so that parts are easier to order and arrive sooner.

We're also working on those challenges that have gone unresolved to date. A useful load increase retrofit is in the works. Once this is tackled, it will allow us to consider other design challenges such as a ballistic parachute, auto-land and a larger cabin.

As a first step toward earning your confidence, we're pleased to announce that we recently secured FAA approval over and will be offering an upgrade to the Legacy G1000 software. It will allow ADS-B to play with the G1000 so you'll get traffic, free weather and all available approaches on your display. We'll also be offering a carbon cowl for the Ovations which will immediately improve useful load. Coming soon will be the long-awaited upgrade from NXII to NXIII. We're also working on an upgrade from the G1000 Legacy to NXII and NXIII.

We also want to extend our hand to the Mooney Community outside of the United States. In partnership with and in support of the Meijing Group, we have a unique opportunity to create an international Mooney network that reaches the many Mooney owners and operators across the globe while growing their numbers. As the Mooney Community grows, we will all benefit.

All of the changes we anticipate are important, exciting and we believe will benefit both Mooney and the Mooney community. But they're not always simple or easy to implement so we ask you to be patient. And as we work on ideas to improve your experience with Mooney, I promise to be in touch with you as we roll them out.

Finally, I want to say a brief word about the folks who work at the Kerrville plant. For the last 6 months I've been overseeing a skeleton crew at the factory. They have been tasked with keeping Mooney alive during a period of instability and stress, not to mention a pandemic. They had no idea whether this change in control would ultimately take place or whether Mooney would even continue to operate, but they put their heads down and forged ahead. They are all dedicated workers and people of great integrity and I'm proud of them. They, along with the Kerrville community, including those workers who were furloughed but who sometimes stepped into help, are the heart and soul of Mooney and I thank them.

Warmly,

CHARLIE GOULD

CHARLIE IS THE OWNER OF THE FIRST ACCLAIM ULTRA

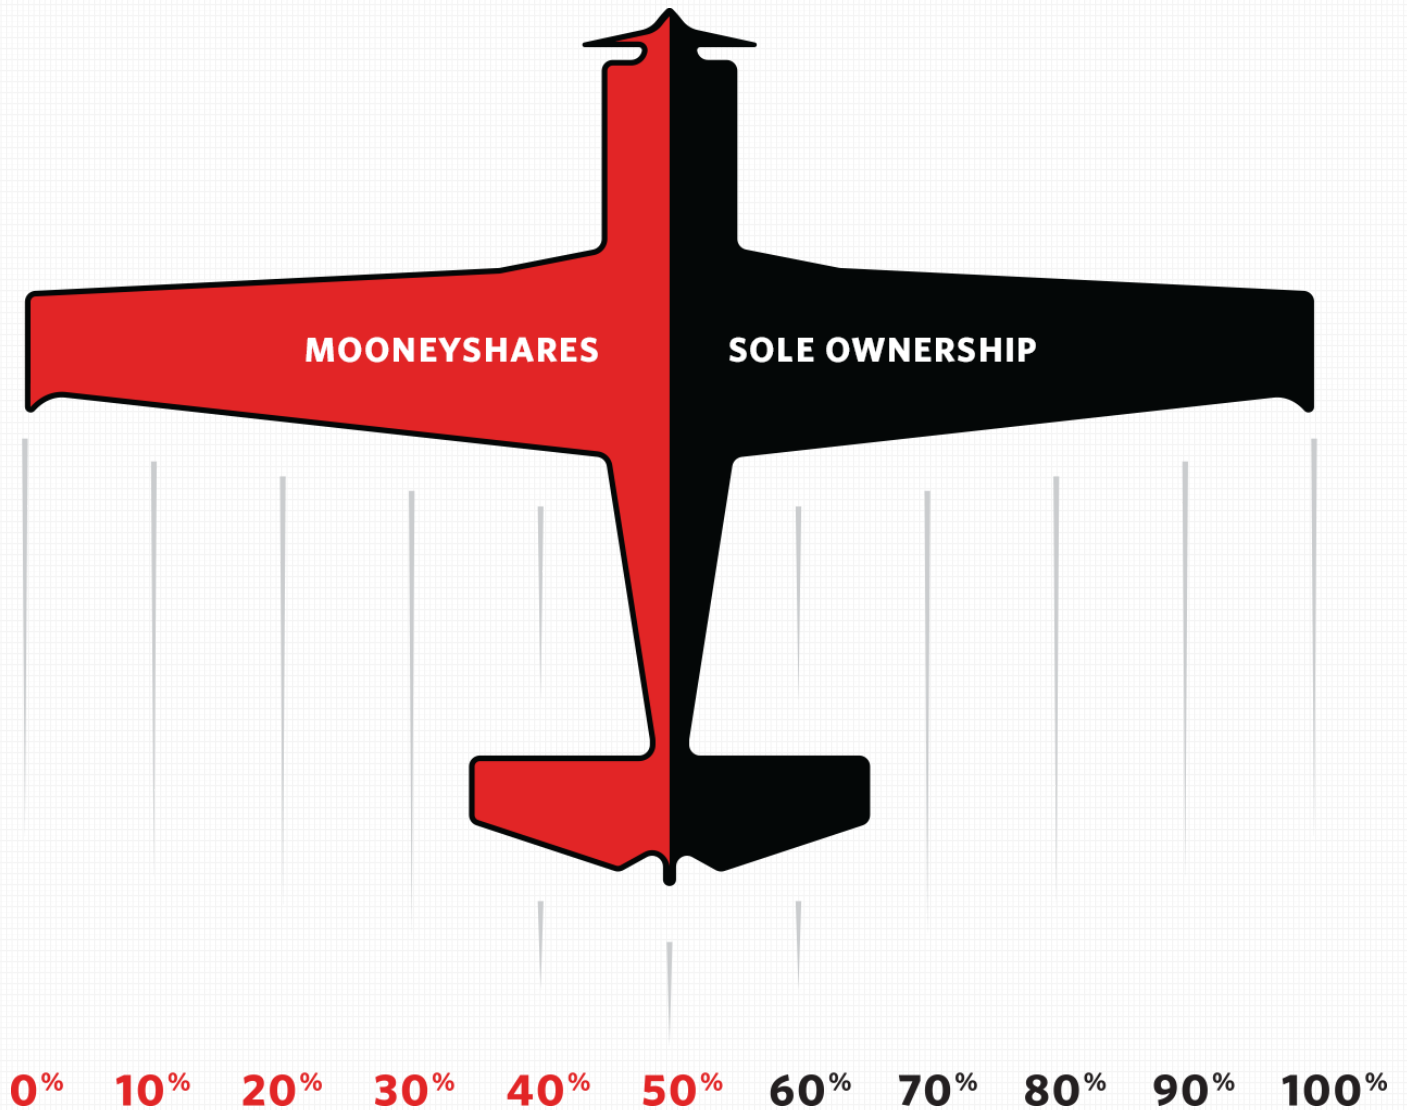

Charlie is the owner of the first Acclaim Ultra He operates between Pensacola,FL and his businesses in the Northeast. "Personally, I use the airplane often to go back and forth between Florida and the Bahamas. It really enables me to spend more time with family and friends while increasing my capabilities for business. The new two-door setup and new interior makes our Mooney comfortable to get in and out of, and the whole family just feels more at home and confident in the airplane." "Mooney's reputation for strength and safety, especially with the unique cabin-surround chromoly-steel cage, won me over. There are a lot of great high-performance singles out there, but Mooney's reputation brings me back every time. I wouldn't buy any other single-engine aircraft but Mooney." Charlie also has a charitable side. "I have flown about 50 hours per year for Angel Flights since 2010, and the Mooney allows me to help others more effectively more often."

BE PART OF THE LEGACY

With more than 70 years of product enhancement and customer support, and a fleet that has accumulated more than 40 million flight hours, you might say we know a thing or two about industry leadership. From speed to range to safety to innovation, we're constantly refining what it means to fly a Mooney. While staying true to the vision established by Al Mooney from the very beginning. A passion for speed, strength, and simplicity defines Mooney's philosophy.

MOONEYSHARES

By sharing acquisition and fixed costs, co-ownership provides the lowest net cost of aircraft ownership. Operators with low-to-medium utilization requirements benefit most.

MINIMIZE THE RISK, MAXIMIZE THE BENEFITS

partnerships.

- Provides co-owner autonomy in tax and title
- Solves conflicts caused by the ongoing communication and coordination required by partners (scheduling, maintenance, etc.)
- Identifies qualified, compatible, co-owners for specific aircraft in a specific geography
- Provides an exit plan that makes entry comfortable

LET US BUILD ONE FOR YOU

We are taking orders for the M20 Ultras. Now is a perfect time to imagine your dream paint scheme and style, leather interior, options for safety and comfort, and special touches that will make the next Mooney, your Mooney.
